

Rapid Assessment & Development (RAD) provides a high-impact approach to assessing, analyzing, developing, and implementing business-improvement solutions that involve process and technology applications. It's the ideal way to improve business analytics, as well as budgeting, planning, forecasting, consolidation, and reporting processes.

## Rapid Assessment & Development (RAD)

### What is RAD?

A business assessment workshop involving your key process leaders. The workshop consists of five, three hour sessions over a two day period, covering four to five core business processes. A one to two week follow-up evaluation and design period produces a solution success plan.

### What can I expect?

After a two day workshop, we spend one to two weeks analyzing the findings, we determine constraints and areas for systemization, and then we jointly develop a proposal and scope document outlining solutions that can be implemented within two to four months. Solutions leverage both technology and process improvements.

### What are some possible solutions?

Custom, state-of-the-art desktop applications that access your current platforms, each application is a Web-enabled, online, real-time desktop solution with simultaneous data access and manipulation capability by concurrent, multiple users.

### How long will it take?

Implementation of typical end-solution plans average two to four months using a joint development team. Large enterprise projects may take longer.

### How much will it cost?

The initial assessment workshop is a standard fixed fee that varies based on the number of processes included in the scope.

### The Breakaway Difference

- We assess processes rapidly and thoroughly, whereas the competition takes two to three months
- We commit chief thought leaders with BOTH technology and business analysis backgrounds to each project
- We have extensive industry expertise in Financial Services, Retail, Life Sciences, and Manufacturing

## Overall Goal

We work together on the Process Solutions and Technology Enablers to move from time spent on manually intensive data management to time spent on value-added activities of business support and actionable analyses.

Breakaway Technologies' **Rapid Assessment & Development (RAD)**, a bold approach to business improvement and technology development, is more than just a technology assessment and solution, more than just a business-process assessment and solution: it enables you to achieve dynamic, high-quality, cost-effective results in an accelerated time frame.

## Rave Reviews from Our Clients

"Breakaway's solutions were well thought out, well coordinated with our business model, and directly resulted in a significant gain for my area."

—Executive Director, Clinical Affairs, J&J Ortho Biotech, NJ

"What Breakaway did was truly amazing. Normally I'd have to invest in a three-to four-month project with a Big Four consulting firm for what they did in just two days. Their output was fantastic, extremely focused, and our team really felt part of the solution."

—Finance Leader, Research Triangle Institute, NC

## About Breakaway Technologies, Inc.

Breakaway delivers superior business solutions by using and recommending technologies that add value to our clients' business decision process, while providing the scalability that enables growth. We focus on solutions and results, and are constantly identifying ways to help our clients gain a competitive advantage, reduce operating costs, and assess performance across the enterprise.
