IBM Cognos TM1 End User

Duration: 1 Day **CPE Credits:** 7 CPE Credits
Level: Beginner No Advanced Preparation Required
Prerequisites: Intermediate Excel or equivalent experience

The TM1 End User course is designed to introduce the user to the most commonly used features of TM1. The course focuses on TM1 Perspectives client (Excel add-in) reporting functions, Cube Viewer, and Subset Editor. Particular consideration is paid on the various methods for inputting data and cube view customization. The course also touches on other TM1 clients, including CAFÉ, TM1 Web, and IBM Cognos Insight.

IBM Cognos TM1 Advanced Reporting

Duration: 1 Day **CPE Credits:** 7 CPE Credits
Level: Intermediate No Advanced Preparation Required
Prerequisites: Completion of "IBM TM1 End User" course or equivalent experience

The relationship between Excel reports and TM1 is a key component to a successful deployment, adoption and flexibility of the application. This course focuses on the fundamentals of Excel report construction, as well as best practices for design and distribution of reports using TM1 Perspectives client. Active Forms and IBM Cognos Insight are also revisited in this class in greater detail. The course is hands-on, and each user will be able to demonstrate the acquired skills through numerous exercises.

IBM Cognos TM1 Administrator

Duration: 1 Day **CPE Credits:** 7 CPE Credits
Level: Intermediate No Advanced Preparation Required
Prerequisites: Completion of "IBM TM1 End User" course or equivalent experience

This course prepares the user with the procedures required to appropriately monitor, manage and maintain their TM1 environments. The course begins with an introduction to the structural aspects of TM1, including various methods for creation of dimensions and cubes, managing elements, attributes and hierarchies, as well as other components of TM1 databases. The course progresses through the data files, backup / recovery procedures, and security management. The course also includes an introduction to Performance Modeler and Operations Console for task management and monitoring.

IBM Cognos TM1 Rules

Duration:	1 Day	CPE Credits:	7 CPE Credits
Level:	Advanced	No Advanced Preparation Required	
Prerequisites:	Completion of "IBM TM1 End User" course or equivalent experience		

The TM1 Rules course provides the foundation needed for an advanced user to create rules in TM1. The TM1 Rules engine provides users with the ability to create real-time/dynamic calculations to support their scenario modelling and business processes. By beginning with a very basic rule, progressing to more complex rules, then integrating practical applications, this hands on course provides the fundamentals to build dynamic and effective rules.

IBM Cognos TM1 Turbo Integrator

Duration:	1 Day	CPE Credits:	7 CPE Credits
Level:	Advanced	No Advanced Preparation Required	
Prerequisites:	Completion of "IBM TM1 End User" course or equivalent experience		

TM1 Turbo Integrator is the ETL tool within TM1 which enables the user to automate many of the TM1 functions, including dimension building, creating cubes and data loading. Students will be exposed to different business scenarios for load and extracting data both within TM1 and between external systems. The TM1 Turbo Integrator course begins with a very basic process and advances through to more advanced processes.

Integrated Business Analytics: IBM Cognos BI

Duration:	1 Day	CPE Credits:	7 CPE Credits
Level:	Intermediate	No Advanced Preparation Required	
Prerequisites:	Completion of "Advanced Reporting" course or equivalent experience		

This course introduces users to the key business analytics applications of IBM Cognos TM1 and IBM Cognos BI. Through live classroom demonstrations, hands on activities and exercises, users will learn the techniques to design, develop and deploy meaningful reports to all levels of the organization. Using a pre-defined TM1 data model, the course covers three core concepts of business intelligence reporting: selection of report type for best representation of data; techniques for creating reports with data from OLAP data sources; and end-user or self-service analytics.

About Breakaway Technologies
