

As a small to mid-size business, grappling with out of control information from multiple data sources has been an age-old problem. The result is painful manual load processes, clunky MS Access databases and cobbled-together spreadsheets. Breakaway's BPM Connect helps you solve this challenge. Talk to us about how we can help jump start your next integration project.

Analytics Automation

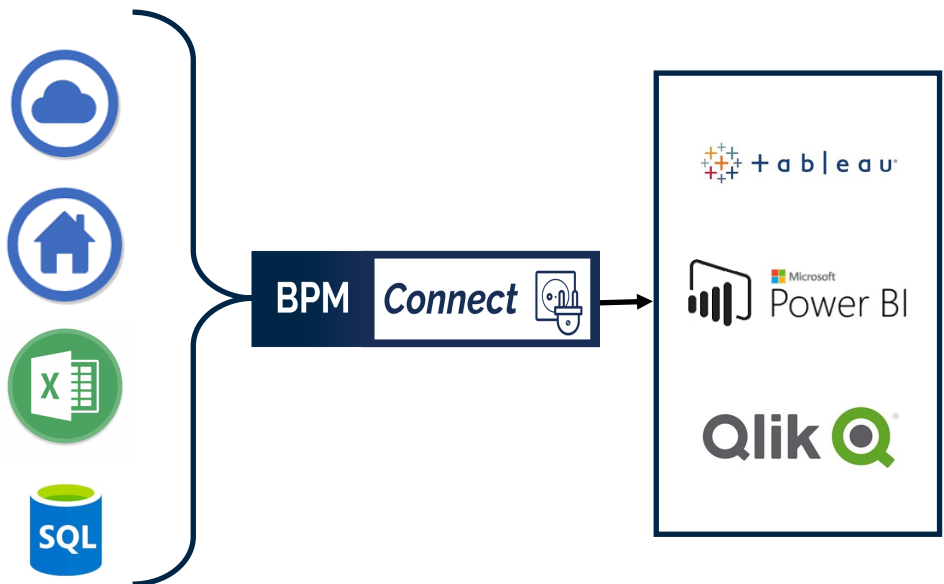

BPM Connect

The Breakaway Difference

- Business performance management experts with 20+ years of experience blending technology and analytics.
- Expertise of a full-service consulting firm with an personal touch.
- Proven accelerators and implementation methodologies.

BPM Connect is an integration-in-a-box solution that provides live connectors, updateable ETL business rules, and prebuilt reports for popular ERP systems and cloud platforms. It uses the power of Excel to help business users create data mappings and business logic, blending the controls and automation needed by IT with the flexibility and ease required by business users.

BPM Connect solves the data accuracy and governance challenge created by modern visualization and dashboarding tools by enabling the people who know the data the best to control the data pipeline.
